

## Archway Newsletter

### New Source for Bentley Software throughout North America

Archway Systems has been a successful Bentley Channel Partner and Trusted Advisor for 30 years covering California, Hawaii, Nevada and Arizona. Effective May 1, 2022, Bentley has extended Archway's agreement to enable Archway to provide the same sales and services **to all states and Canada**, including Virtuosity subscriptions via purchase order or credit card.

In addition, Archway continues as a Bentley Qualified Training Partner for Bentley desktop software including MicroStation, Synchro, ProjectWise, OpenRoads, OpenBridge, OpenFlows, and ProjectWise. If you have a project coming up that requires Bentley software, please give us the opportunity to compete for your business.

### Report: The Benefits of Remote Training

When the pandemic hit and suddenly everything was being done remotely rather than in person, we all assumed this was a negative we would just have to live with for a period of time. To our surprise, we found there was **a number of benefits to training virtually** over physically in person classes.

Some of the benefits included the fact that training could be done differently. Now class

could be once a week for several weeks, every other day, half days, or any number of other options. Classes can be customized per company and what their needs are for training and their employees schedules. Companies don't have to pull employees off projects just to get training in, and employees can focus on the training when they're in class. Travel costs are also cut down and employees have the familiarity of learning from their own workstation or even from home.

Breaking up of the training days also gives students a chance to digest what was learned. Instead of being overloaded with information for 3 days, they get a chance to spend time putting what they've learned into practice and come back to the next class with practical questions. It also gives the instructor extra time to find the best answers to some questions they may not have an answer for right away. For questions, there's also the possibility of remotely bringing in another expert to answer questions if necessary.

A few of the other benefits include the convenience of remote training. These sessions can be recorded, if requested, so that students can go back and review the information taught at a later date if needed. You can always see the screen close up and see what the instructor is doing instead of sitting in the backrow trying to see the screen on a projector. These trainings, depending on instructor availability, can be put together quickly in case you need last minute training since no one has to travel.

Though Archway has moved to offering in person training again on site, remote training has become our norm for our open enrollment to allow for the flexibility and ease that companies and employees alike want to see. These benefits and more are why this push to doing everything remotely has been a great success for Archway and the companies we train. What class can we do for you?

## In Person Bentley Bash - Anaheim 2022

We are so excited to see you all again! Save the date now for the next **in-person** Bentley Bash at the Digital Built Week Americas (DBW) Conference at the Anaheim Convention Center in Anaheim, CA **June 14-16, 2022!**

We will have hands-on workshops and lectures taught by Archway and Bentley experts. We will be covering software including MicroStation, ProjectWise, OpenRoads, OpenBuildings, SYNCHRO and RAM Structural System. We will feature new classes like "RAM Structural System: What is it thinking?!?" and "OpenBuildings - iTwin Services" and of course have some of your favorites like "MicroStation Tips & Tricks", "AccuDraw Basics", and "OpenRoads Designer Tips & Tricks".

You also will receive free access to the Exhibit Floor of the DBW Conference for attending the Bentley Bash!

We are so excited to offer you this in person event again and hope that you are as excited to join us. Registration is open now!

Registration is  
Open!

## Going Digital in Infrastructure Awards 2022

Nominations for the *Going Digital in Infrastructure Awards* close next week! These awards are the highlight of the infrastructure industry each year. They are a global competition that recognizes digital advancements in infrastructure.

All you need is to complete the submission form, submit at least 3 hi-resolution images of your project and add any additional videos, walkthroughs, simulations, or other supporting material you would like.

Archway has helped many finalists and several winners in past years. Please reply to this email if we can help you with selecting a project or with the submission process. We want to help you win this year!

Submission deadline is **May 23, 2022**. Click below for more information about the 12 categories, the awards, and to start your submission process.
